

Please do NOT change the current telephone privacy laws and do NOT implement a new proposal to change those laws. I used to recieve three to four telemarketing calls nearly EVERY DAY. Now, I do not recieve any calls. It is wonderful!! I have 2 small children at home and do/did not have time to answer telephone calls for unwanted goods and services. I am a low-middle income person with no need to buy anything over the telephone. The privacy law has been a godsend to my family. Please, please leave the laws alone! My privacy is very important to me and so is this law.
